

FAS 500 Asset Inventory

FAS 500 Asset Inventory provides asset inventory tracking and reconciliation capabilities for SQL Server-based computing environments, allowing for additional scalability and growth. Building on the solid foundation of FAS 100 Asset Inventory, FAS 500 Asset Inventory extends the scope of fixed asset tracking and allows your

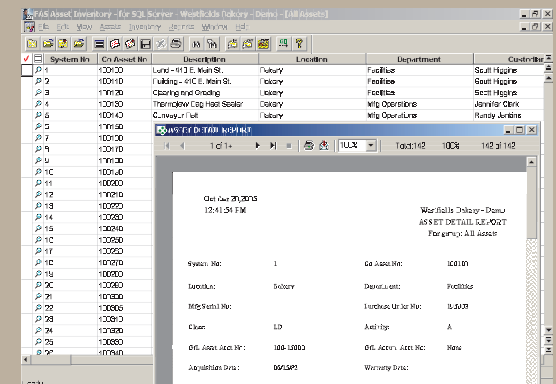

business' catalog of fixed assets to grow without limits. By complementing your FAS 500 Asset Accounting installation with FAS 500 Asset Inventory, you will expand your ability to capture and track valuable fixed asset data, saving money on tax and insurance overspends.

Achieve more powerful control over your fixed asset inventories.

- Seamless integration with FAS 500 Asset Accounting
- Allows increased access to fixed asset data and considerable database capacity
- Faster processing times with enhanced computing architecture utilizing Windows Server™ and Microsoft® SQL infrastructures
- Check In/Check Out feature with a Check Out History constantly monitors large numbers of portable assets
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Track assets at remote locations, where inventories can be conducted by exchanging data via email attachments
- Import/Export Helper allows you to import data from, or export data to, the most popular spreadsheets and database applications

- Windows Mobile® and Palm OS® devices make it easy to perform inventories
- Over 50 fully customizable fields with the ability to control data entry and notes, plus images to describe each asset record
- A robust fixed asset inventory management tool, suited to the needs of environments with thousands of fixed assets

FAS 500 Asset Inventory delivers advanced inventory capabilities utilizing the power of a SQL server environment.
