

What's New with the Sage MAS 90 & MAS 200 Version 4.2

Business Framework Enhancement of the Accounts Payable-Such as:

- 1) Greater flexibility in Security over Accounts Payable, with the new Create / Modify / View control options, and Security Events tracking.
- 2) New Data Entry look and feel-(with Modifiable- Primary & Secondary Grids) similar to what you have already seen in Accounts Receivable & Sales Order 4.1
- 3) More Wizards are now available to help you during those complex operations or functions, such as, during the initial Setup.
- 4) Saved report settings, are now available, on all Accounts Payable reports, and all the standard Reports & Forms in AP are in Crystal Formats only.
- 5) The Customizer functions have been enhanced; Memo Management and PTD / YTD History tracking, have both been greatly improved.
- 6) Many of our Customer & Partner enhancement requests, have been implemented such as a better way to enter those wire transfers, as a form of payment.

Business Insights Enhancement with the introduction of BI Explorer

- 1) This new feature gives you a new way of analyzing your data across the Enterprise, with these new powerful built-in Views, Filters, drill-downs and drill-around concepts, you get flexibility.
- 2) Now your users can explore and navigate their day-to-day transactions in whatever way they feel appropriate, with built-in user preferences at their fingertips.
- 3) From the BI Explorer's Preview option, the records can even be merged and new reports generated using products like Microsoft Access, Excel or Word.

And this is just our short list of "What is New with Version 4.2".
